

Acerca de TerriData

TerriData is a **tool** to strengthen public management based on Colombia's municipal, provincial and regional statistics.

TerriData's main **goal** is presenting and promoting the use of standardized comparable indicators, to account for results of several dimensions for all Colombian territorial entities.

TerriData **emerges** as a response to several Organization for Economic Co-operation and Development—OECD's recommendations and as supporting tool to fulfill local needs of better data to describe territorial realities.

TerriData is useful and practical for:

PUBLIC SERVERS AT ALL LEVELS

Providing information to design and target programs and projects.

Guiding and helping in defining goals and baselines for territorial development plans

FOR EXECUTING PLANS, AND PROJECTS PROGRAMS

by providing data for monitoring, analysis and continuous improvement of public management.

IN MANAGEMENT EVALUATION
by the availability of different results indicators, key in goal monitoring and measurement.

IN MANAGEMENT CONTROL
with inputs to prepare management and result reports in public accountability processes.

RESEARCHERS, STUDENTS AND ACADEMIC MEMBERS.

FOR ACADEMIC ACTIVITIES, it provides data on municipalities and provinces to analyze and study different local issues in the classroom.

IN DEVELOPING ANALITICAL ACADEMIC RESEARCH TO ACCOUNT FOR SOCIAL economic and environmental phenomena in 1101 municipalities and 32 Colombian territorial entities.

CITIZENS IN GENERAL

PROVIDING UP TO DATE TERRITORIAL COMPARABLE statistics to help in participation, mobilization and control processes.

Población desagregada por sexo
Fuente: DANE - Proyecciones de población - 2019

América Latina 3.308.861 (48,9%)	América Latina 3.459.507 (51,1%)
Colombia 2.487.509 (49,4%)	Colombia 2.520.149 (50,6%)

BUILDING AND CONSOLIDATING A NETWORK OF SERVERS FROM DIFFERENT BACKGROUNDS, involving academia and citizens, who use statistical data as a tool to promote development, and want to share its user's experiences.
